

VISTO 48™

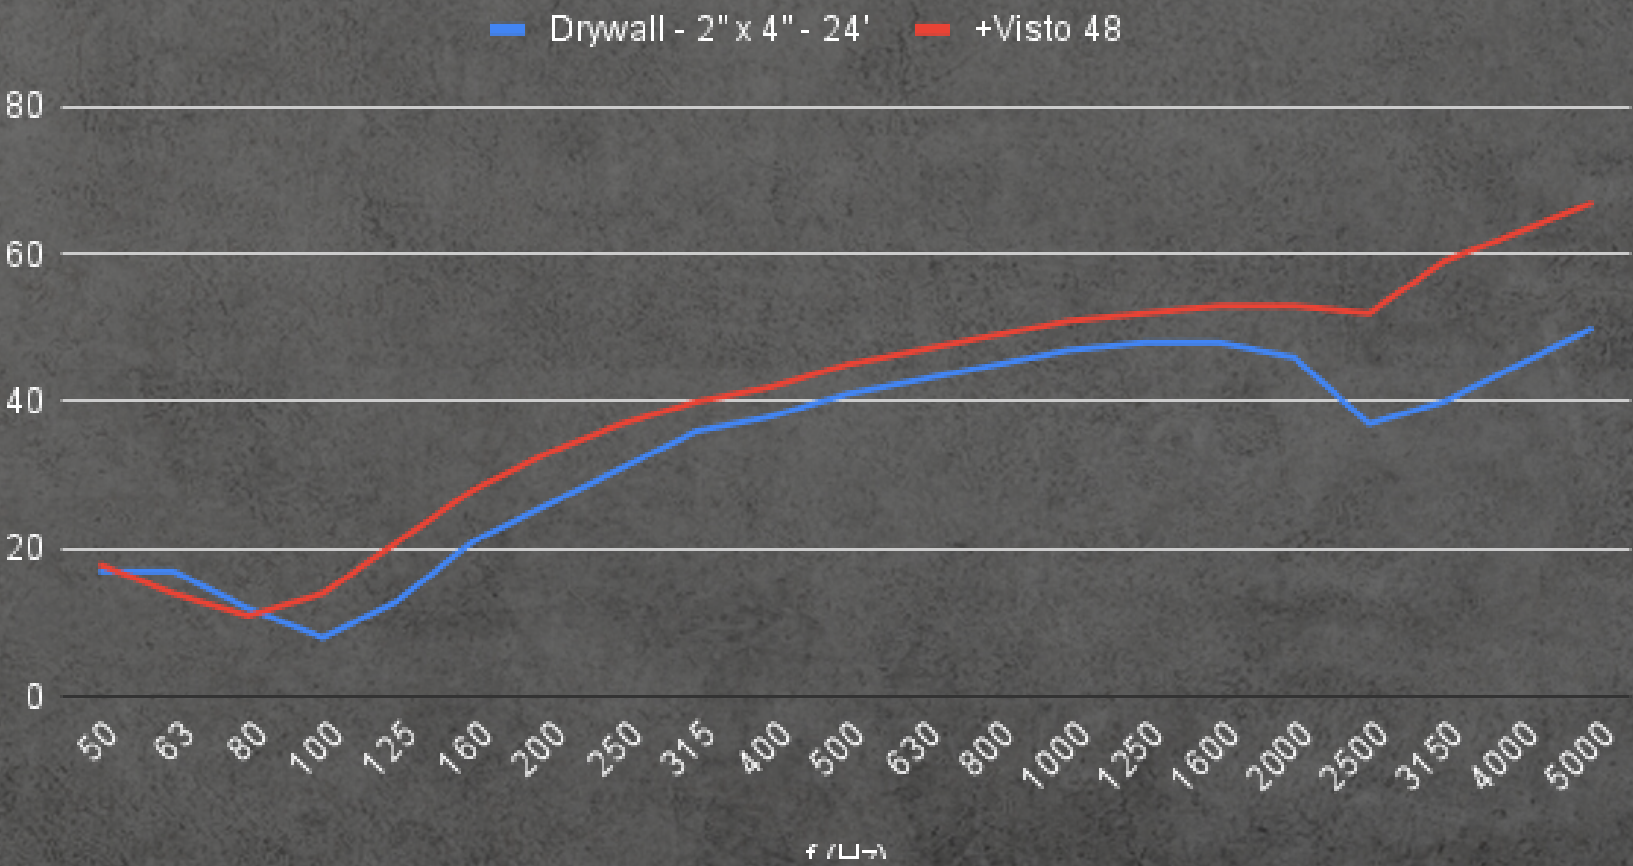

VISTO 48 is a high - tech soundproofing and sound absorbing elastic panel for walls and ceilings. The different layers combined in the panel achieve much higher levels of sound insulation compared to the traditional materials such as glass, mineral, rock mineral wool or cork.

The position of the highly elastic polyvinyl diaphragm (middle layer) works as a soundproofing and sound absorbing membrane. The wavy shape of the porous material (front layer) has optimised geometry that increases sound absorption in the frequency range of 400-650 Hz, which are the most typical frequencies of the human voice.

VISTO 48 panel has a fire resistance class of B, s1 - d0.

Sound reduction index

Technical information & Packaging

Dimensions	40" x 24" x 2"
Weight	6 lbs
Airborne Sound Reduction STC in 2 x 4 wood stud, 24 O.C. 5/8 drywall	45 dB
Packaging Dimensions	49"x 41" x 63"
Quantity per pallet	80 panels
